PROJECTS

FinWise AI | React, AI, Stellar

- Developed an AI-powered financial advisory platform with blockchain-based reward mechanisms.
- Integrated AI-driven budgeting, savings recommendations, and financial planning features.
- Implemented on-chain reward tracking using Stellar blockchain.

Shadow AI | React, Node.js,

- Developed an AI-powered security assistant to prevent accidental exposure of sensitive data in public AI tools.
- Implemented detection of API keys, credentials, personally identifiable information (PII), and confidential business data before submission.

PlantCare | React, Python, Gemini AI

- Built an AI-powered plant care assistant that provides personalized guidance throughout a plant's lifecycle.
- Integrated Google Gemini AI to generate customized recommendations based on plant species, environmental conditions, and user inputs.
- Implemented visual care guides and intelligent reminders to help users monitor watering, nutrition, and overall plant health.

TECHNICAL SKILLS

Languages: JavaScript, Solidity, Python

Frontend: React, HTML, CSS, Tailwind CSS

Backend: Node.js, Express

Blockchain: Ethereum, Solidity, Hardhat, Stellar, Ethers.js

Databases: PostgreSQL, MongoDB

Tools: Git, GitHub, VS Code, MetaMask

ACHIEVEMENTS

Project Highlights

- Built multiple full-stack applications integrating AI and blockchain technologies.

- Developed decentralized applications using Ethereum and Stellar ecosystems.
- Designed secure smart contracts for blockchain-based reward systems.
- Completed three blockchain-focused internships involving Web3 development and smart contracts.
