PROFESSIONAL SUMMARY

Developer who has built decentralized applications with Solidity, Ethereum, React, Rust and PostgreSQL. Delivered projects spanning smart contracts, token and NFT reward systems, wallet authentication and AI integrations, and completed three blockchain internships. Seeking software engineering, blockchain development and Web3 roles.

TECHNICAL SKILLS

Languages: JavaScript, Solidity, Python, Rust
Frontend & Backend: React, HTML, CSS , Node.js, Express
Blockchain & Smart Contracts: Ethereum, Solidity, Hardhat, Ethers.js, ERC-20, NFTs
Databases: PostgreSQL, MongoDB
Foundational Exposure: Go (basic), Power BI, distributed systems, tokenomics, DeFi
Devops: git, git-hub, dockers(basic), Kubernetes(basic), CI-CD (basics)

INTERNSHIPS & EXPERIENCE

Blockchain Development Intern — Stellar (Virtual) Feb 2026 – Apr 2026

- Built blockchain-powered reward mechanisms using the Stellar ecosystem.
- Worked on AI-integrated financial applications that use blockchain incentives.
- Collaborated on backend logic and blockchain transaction workflows.

Blockchain Development Intern — Code Alpha, Pune Jul 2025

- Developed Solidity smart contracts for decentralized applications.
- Integrated MetaMask wallet authentication into Web3 applications.

Blockchain Development Intern — Future Intern (Virtual) Apr 2025 – Aug 2025

- Developed Ethereum and Solidity projects, implementing smart contract functionality following security best practices.
- Took part in project planning, testing, debugging and deployment.

PROJECTS

FinWise AI | *React, AI, Stellar*

- AI-powered financial advisory platform offering budgeting, savings recommendations and financial planning, with on-chain reward tracking on Stellar.

Shadow AI | *React, Node.js*

- AI-powered security assistant that detects API keys, credentials, PII and confidential business data before submission to public AI tools.

PlantCare | *React, Python, Gemini AI*

- AI plant care assistant using Google Gemini to generate recommendations from plant species, environment and user input, with visual care guides and watering and nutrition reminders.

EDUCATION

Savitribai Phule Pune University, Pune 2024 – 2028 (expected)
B.Sc. in Blockchain Technology

CERTIFICATIONS & ACHIEVEMENTS

- **Certification in AI/ML** — Samsung Innovation Campus
- Completed three blockchain internships covering Ethereum, Solidity and Stellar development.
- Built multiple full-stack applications integrating AI and blockchain, including secure smart contracts for reward systems.
